Frequently Asked Questions

- Q: Why is the voice box not showing up?**

You may be using an unsupported browser. Try switching to Google Chrome or Microsoft Edge.
- Q: Where do I see what parts I have?**

The Parts page will list all the parts you have and you can modify/add more there.
- Q: How do I get a backup of all this information?**

The Dashboard has an Export button that saves a file copy of all your parts.
- Q: Can I change the location of a container if I move it?**

Yes! The containers on the Container page have the ability to be edited by clicking on the pencil symbol.
- Q: How do I go about adding a Part?**

To add a Part, navigate to the Parts page and enter the name of the Part and optionally a category for the Part.
- Q: Where can I find more help for performing actions?**

On each necessary page there is a '?' symbol in the top left that will help give information about each page.
- Q: How would I update a Part or Container and why would I do that?**

The corresponding page will have a pencil symbol next to each item. Click this for the item you want to update and edit the desired fields before hitting enter.
- Q: What if I want to get rid of something in the system?**

For each item there is a trashcan symbol next to the item. Click this to prompt a confirmation message, once you confirm the deletion the item will be removed.

Voice Commands Help

X

**This page is for using voice commands and exporting/importing inventory information**

To start the voice command, click the start button and speech your command

To clear the transcript, click the reset button

The export button will save a .csv file with the information of the inventory. This can be used as a backup file

The import button will prompt for a .csv file and attempt to import the data into the inventory

\*Note: If voice is not be detected, allow the site to use your microphone by clicking the icon to the left of the URL and allowing microphone use

**Tip:** When naming multiple similar objects use letters instead of numbers  
i.e. (Screw A, Screw B, Screw H)
